DETAILED ACTION

Response to Amendment

Applicant's arguments filed 3/3/05 have been fully considered but they are not persuasive. The Amendment submitted by Applicant does not overcome the rejection made by Examiner in the last Office action and for the following rejection.

Claims 14-21 and 38-46 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for "Ar is an independently selected divalent aromatic radical", does not reasonably provide enablement for ---with or without substituents containing one or more fused aromatic rings, one or more non-fused aromatic rings without intervening functional groups, or combinations thereof wherein the radical sites are on the same or different aromatic rings---. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

The Amendment to claims 14, 38 and related claims raise new issues that would require further consideration and search.

The Declaration filed under 37 CFR 1.132 has been fully considered but it is not persuasive since it is not commensurate in scope with the claims.

Claims 14-21 and 38-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keller et al (US 4,256,471)

The rejection is maintained for the reasons as stated in the last Office action and for another reasons, as stated above.

Claims 47-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keller'760 or '926.

Applicant's arguments are based on the presence of a copper compound in the claimed process, when reacting the dihydroxyaromatic with a dihaloaromatic component in that it allows for the reaction without an activating group in the reactants; and the dihaloaromatic contains an R group in the references that is an electron withdrawing group. This is not found persuasive since it is not commensurate in scope with the claims and the products of the references had been formed in the absence of a copper compound in the first step.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1711

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
